Demilumen on TR4 track [TR4-127-AL]

System Availability	Fixture	Finish
CA4 - Cable 4"	127	AL - Aluminium
TR4 - Twin Rail 4"		NK - Polished Nickel

The Demilumen is Precision Lighting's trademark luminaire. Its elegant extrusion forms the basis of our logo, and its classic design means that it's still going strong many years after its introduction. Gold plated sprung sockets for the MR16 lamp pins provide excellent electrical connection. The gimbal design allows for a great range of adjustability and it is available with a number of snoots, louvers and lenses for maximum beam control.

Notes:
